SUMMARY

Software Engineer specializing in the design and implementation of web applications and services. Experienced in frontend and backend development, machine learning, and data processing. Previously worked at a VC-backed SaaS startup and multiple short and long-term contract roles across various industries. Fluent in Golang, Python, TypeScript, and SQL, with proficiency in Java.

EXPERIENCE

Software Engineer

September 2023 - Present Ottawa, ON

TwinsMusic Enterprises

- Developed a new version of an online, subscription-based music library, resulting in a 20% increase in user engagement.
- Optimized database queries and improved system performance by 40% through refactoring and performance tuning.
- Introduced a new parallelized testing framework for unit and integration tests, reducing execution times by 50%.
- Mentored junior developers in best practices and system design, and did code reviews and weekly one-on-one sessions.

Software Engineer

Self-employed @ hakanokay.dev

February 2023 - September 2023

- Ottawa, ON
- Optimized ETL processes of a marketing firm, reducing execution times by 25% and saving over \$100,000 annually.
- Used machine learning to personalize ads for an e-commerce with ~4700 monthly users, boosting revenue by 15%.
- Developed a service for managing and testing machine learning models, allowing faster integrations on new models.
- Designed and built a web application to manage and track sales of an online business, reducing processing times by 30%.

Software Engineer

Bruin

March 2022 - February 2023 Ottawa, ON

- Added new features to a CLI performing data processing on the platform, reducing pipeline development times by 30%.
- Optimized an API generating analytics reports, integrated more KPIs and improved response times by 15%.
- Debugged the parser of an Airflow pipeline generation and management tool, and increased the test coverage by 10%.
- Automated data modelling for apps with similar characteristics through templating, allowing faster onboarding.
- Built and managed ETL pipelines processing terabytes of data daily, generated from 10 clients across 35 mobile apps.

SKILLS

Languages: Golang, Python, TypeScript, SQL

Frameworks: React, Next.js, Tailwind

Tools: Linux, Git, Docker, GCP

Databases: MySQL, PostgreSQL, MongoDB

Familiar with: Java, Airflow, React Native, Expo

PROJECTS

Quill: Chat with your PDF files.

TypeScript, React, Next.js, Tailwind, tRPC, Pinecone, Stripe

Live at quill.hakanokay.dev

WorldMaker: Create cities in your browser.

JavaScript, Canvas API, Data Structures (mainly Graphs)

Live at selfdriving.hakanokay.dev

EDUCATION

Algonquin College

Diploma in Computer Programming | Honours

Miuul & Data Science Academy

Certificate of Data Science and Machine Learning

Akdeniz University

Bachelor of Science in Engineering

September 2022 - February 2024

Ottawa, ON

December 2021 - March 2022 Izmir, Turkey

, ,

September 2014 - September 2019

Antalya, Turkey
